

CAREER PROFILE

Motivated and driven DevOps Engineer with an M.Sc. in computer science and over 5 years of professional experience working in projects from small to complex. Working in a fast-growing startup, where I am tasked with managing and developing the infrastructure for developers as well as the internal tooling.

For the last 2-3 years I was actively leading a team of developers, by checking their capacity ratios and helping them to grow both with external and internal courses. This also included myself, where I could gather experiences with both AWS and Azure.

EXPERIENCES

Head of DevOps & Infrastructure

2020 - now

Motius GmbH, Munich

With the team now consisting of five developers and me informally leading them, the decision was made to appoint me as their supervisor. In close cooperation with our CTO I designed and structured an approach on transitioning towards Kubernetes. With the company growing rapidly I saw the need for internal training for our new developers, to bring them up to speed with both Kubernetes and the basic DevOps mindset.

At the moment my team and I are maintaining a small 15 node cluster on bare-metal servers hosted with Hetzner. This cluster is used for internal tooling such as the integrated business platform as well as the delivery for our client projects.

- Kubernetes & Helm
- Trainings for colleagues

EDUCATION

Computer Science Master of Science (M.Sc.)

Technical University of Munich
2015 - 2017

Informatics: Games Engineering Bachelor of Science (B.Sc.)

Technical University of Munich
2011 - 2014

LANGUAGES

German

English

INTERESTS

Lifeguard with the Red Cross

Swimming

Volleyball

Fitness

SKILLS

DevOps Engineer

2019 - 2020

Motius GmbH, Munich

With the company growing the need arose for a more structured DevOps approach, which to me was a great opportunity to apply the experience that I gathered in the past and broaden my knowledge in a newly rising field. During this time I have also been named the interims lead for this section of the company.

- Docker & Docker-Compose
- Python
- CI/CD (Gitlab, Jenkins)

Kubernetes

Linux

AWS & Azure

Python

Java & Scala

NodeJS

Project Owner

2018 - 2019

Motius GmbH, Garching

After the first successful projects and multiple university projects related to project management, the logical next step was to apply my theoretical knowledge to real projects. The company used a very modified variant of the scrum model for software & hardware projects.

Junior Software Engineer

2017 - 2018

Motius GmbH, Garching

For this project, we developed a retrofit device to enable washing machines to be connected and controlled using an App. In this project, I was using existing off-the-shelf hardware components intending to create a robust proof of concept.

- Raspberry Pi
- Python
- Linux / Bash / Systemd

PRIVATE PROJECTS

Red Cross (Wasserwacht) - Part of the managing committee for my local section

Vaccination Center - Hosting the engelsystem on a k3os cluster for the Bavarian Red Cross

BurmillaOS - Recreated and adapted the documentation using Hugo

Arch User Repository - Maintaining a small collection of PKGBUILDS
